Notice according ISO 14001 standard and ISO 45001 standard

Dear valued Customer,

As you may be aware, before the Raytheon merger KIDDE-DEUGRA Brandschutzsysteme GmbH operated under an integrated Environment, Health & Safety (EH&S) management system. This management system had been certified in accordance to the ISO 14001 standard and has expired in May 2022.

After the merger it has been decided not to renew the ISO 14001 certification but to transfer to the Raytheon Technologies Corporation (RTX) management system.

The RTX EH&S Management System is the cornerstone of the Raytheon Technologies EH&S program. It is a framework that organizes the elements of the EH&S program into an efficient mechanism for compliance with EH&S laws, regulations, and company requirements, and for continual improvement. It was developed using key elements from ISO 14001, ISO 45001, and other management system standards.

Please be assured that we will continue to work to the same high standards of an EH&S management system consistent with the requirements of ISO 14001 and ISO 45001.

Should you have any questions or concerns regarding this matter, please do not hesitate to contact your respective point of contact.

Yours sincerely,

KIDDE-DEUGRA Brandschutzsysteme GmbH
